Profile

I am a self-taught, inquisitive frontend developer with three semesters of intensive coursework through Frauenloop, an organization dedicated to empowering women in tech. Persistence has been my driving force – since I started studying programming in 2020, what began as a hobby has grown into a passion I am eager to turn into a career.

Though I lack formal work experience, my curiosity and self-motivation push me to learn quickly and adapt effectively. Known for diving into new challenges headfirst, I am excited to apply my skills in an entry-level role, contribute to impactful projects, and grow alongside experienced team members.

Work Experience

Junior Purchasing Manager – Princeton Ltd.
Jun 2017 – Feb 2020 Tokyo, Japan
- Managed procurement for 15 suppliers across 5 countries in Europe and Asia, overseeing over 60 products
- Streamlined product forecasting with custom Excel functions, improving efficiency and reducing development time
- Collaborated with accounting to process 7-8 payments and invoices monthly, ensuring accuracy and timely processing
- Negotiated with forwarders to achieve a 10% reduction in transportation costs across all freight
- Monitored inventory, handled purchase orders, and coordinated shipments to insure on-time delivery and minimize delays

Junior Language School Manager – ILC Kokusai Gogaku Center
Sep 2015 – Jul 2016 Tokyo, Japan
- Coordinated and organized 5 classes and 4+ workshops every 6 months, showcasing strong organizational skills
- Supported students in developing learning plans, resulting in a 95% positive feedback rate in post-course surveys
- Revamped lesson materials based on comprehensive feedback, driving a 500% increase in student enrollment
- Collaborated with teaching staff to create and implement tailored lessons and curricula, ensuring high-quality education and positive learning outcomes

Frontend development Experience

Web/Frontend Development Cohort – Frauenloop
Jan 2022 - Present Berlin, Germany
- Ideated and developed responsive web applications using HTML, CSS, JavaScript, React, and Python
- Applied problem-solving skills through hands-on development of practical websites
- Showed initiative by creating applications from scratch and self-motivating throughout the process
- Established a self-taught routine and discipline to stay motivated and continually upskill
- Selected to present projects during Demo Day each semester in recognition of the quality and impact of my work

Projects

Learner-Mentor-App
https://github.com/ayumi-ayumi/learner_mentor-app
Displays users on a map using Google Maps API, enabling learners and mentors to connect. Integrated Firebase for chat functionality and user authentication.
–Using TypeScript, React, Firebase, Vite, Google Maps API, React Hook Form, and Material UI

Pomodoro timer
https://github.com/ayumi-ayumi/pomodoro-timer-record
Developed a pomodoro timer app that tracks work sessions and displays daily productivity on a calendar.
–Using React, VIte, and Web Worker API

Technical skills

HTML/CSS, Bootstrap, Material UI, Tailwind CSS, JavaScript, frameworks(React), TypeScript, Next.js, GitHub, Heroku, Version Control(Git), Python, Flask, Web API, Firebase, PostgreSQL

Education

Meiji University
Apr 2008 - Mar 2012
Bachelor of Arts in Literary Arts and Media
